FARFLY®

MEDICAL-GRADE FLOORING

SPORTS-CERTIFIED FLOORING

HIGH-SPECIFICATION FLOORING

Project-focused resilient flooring provider for healthcare, sports venues and high-specification environments.

Verified testing, ready stock, and coordinated installation accessories support efficient project delivery and smooth acceptance.

WUXI TEFA DECORATION MATERIAL CO., LTD.

WHO WE SERVE

Whether you're a distributor, importer, contractor, or trader - if any ofthis sounds like you, let's talk.

01 YOU HAVE THE OPPORTUNITY -YOU NEED THERIGHT PARTNER

You have access to a project in healthcare, sports, or ohigh-specification environment -whether you're still biddingor already won it. You may not be a flooring expert, and that'sfine. What you need is a partner who knows the product, the-technical standards, and can walk with you from proposal toacceptance.

02 YOU WANT TO DEVELOP A PRODUCT THAT DOES-N'T EXIST YET

You know your market -where standard products can't fill aspecific need. We have real R&D capability to turn that need into a deliverable product.

03 YOU WANT IT TO CARRY YOUR NAME

You have your own customers and your own brand. We pro-duce -reliably, to your specificationso you can sell underyour own label.

FARFLY specializes in resilient flooring for healthcare, sports, and other high-specification environments. With 399 international certifications, 300,000 m² of ready stock, and 7-day dispatch capability, we help project teams deliver on time and pass project acceptance smoothly.

FARFLY - YOUR TRUSTED FLOORING SOLUTION PARTNER

15 Years	399	300000 M²	7 Day	100+
Project Experience	Certifications	Ready Stock	Dispatch	Export Markets

- **01 Acceptance Guaranteed:** 399 certifications covering EU REACH, SGS, CE, ISO9001, BWF, and medical-grade antimicrobial standards.
- **02 Project Schedule Guaranteed:** 300,000 m² ready stock and 7-day dispatch help avoid construction delays.
- **03 Installation System Guaranteed:** Flooring, welding rods, skirting, adhesive, and accessories are supplied as a complete matched system.

WHY CHOOSE FARFLY?

399 International Certifications

EU REACH · SGS · CE · ISO9001 · BWF · Bfl-s1

Meeting the strictest project acceptance requirements.

Implemented in Central Asia

Bishkek Medical Facility: 3,000 m² delivered. Verifiable project reference.

Complete Supply

One-stop matched project delivery: flooring + welding rods + skirting + adhesive, with synchronized accessory colors.

OEM & ODM Custom Development

OEM production based on customer drawings is supported. ODM development from zero to new product is also available.

300,000 m² ready stock • 7-day dispatch • Exported to 100+ countries worldwide

WHY ORDINARY FLOORING FAILS IN HOSPITALS

Healthcare is one of FARFLY's core application areas. Ordinary flooring often fails in medical environments due to:

• Iodine Penetration

Chemical penetration may cause hygiene risks and permanent stains.

• Indentation from Heavy Medical Trolleys

Heavy medical trolleys can leave permanent indentations and affect smooth movement.

DENSE SURFACE TREATMENT

A proprietary dense surface layer allows iodine stains to be wiped clean easily and passes the 24-hour stain resistance test.

Through-Body Homogeneous Structure

Repairable scratches. No waxing required. Long-lasting performance.

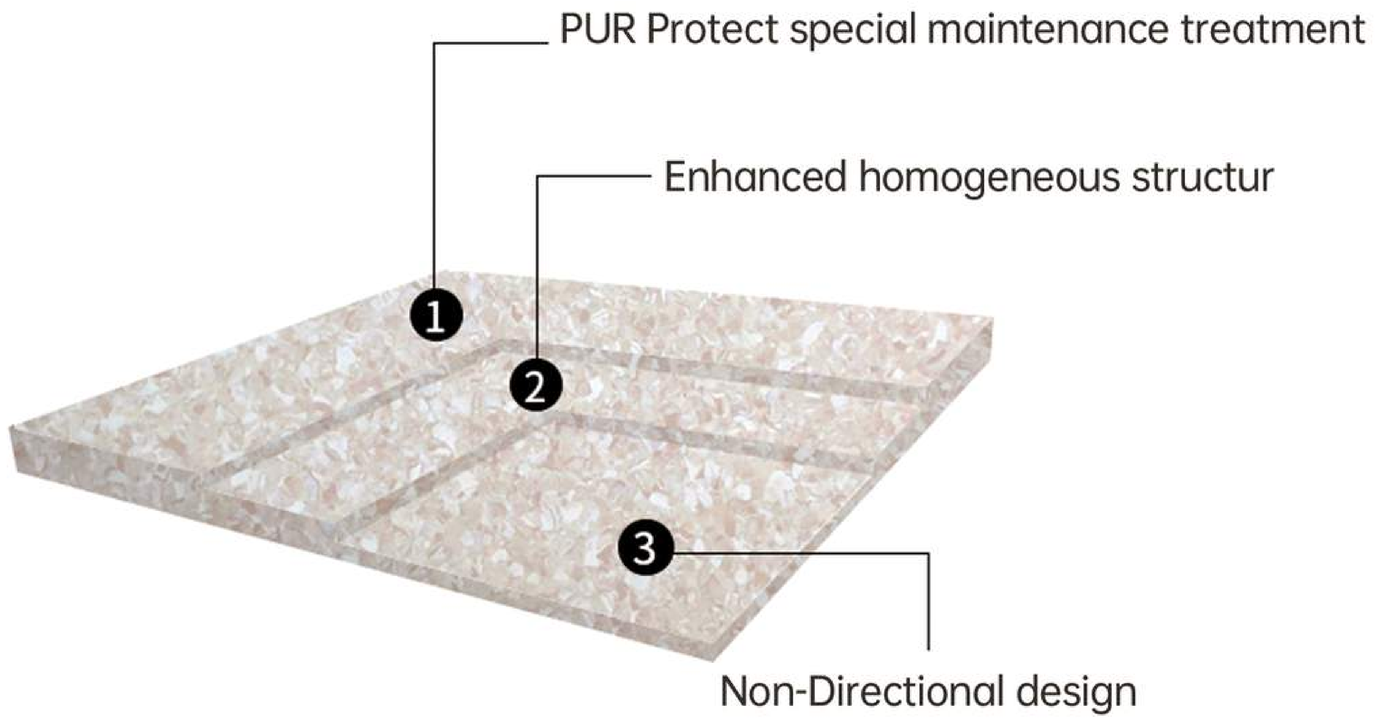

- **Structure:** Homogeneous Vinyl
- **Wear Resistance Grade:** Group T, highest wear resistance grade
- **Thickness:** 1.2/2.0/2.5/3.0/4.0mm
- **Size:** 2 m × 20 m / roll
- **Fire Rating:** Bfl-s1
- **Antibacterial Performance:** >99%
- **Residual Indentation:** ≤0.06mm
- **Standard:** Complies with European standards

- ICU / Intensive Care Unit

Medical Standard Series

Bonai-Tech / T-Solid

More color options are available in the sample book.

WHY ORDINARY FLOORING FALLS SHORT IN SPORTS FACILITIES

Sports is one of FARFLY's key application areas. BWF certification is more than just a label.

Insufficient Shock Absorption

Hard flooring increases pressure on ankles, knees, and hip joints, raising injury risks.

Insufficient Slip Resistance

The slip resistance coefficient does not meet requirements during sudden stops and turns, increasing the risk of falls.

Rapid Wear

Rapid wear under high-intensity use leads to frequent maintenance and higher operating costs.

BWF-Certified Shock Absorption

Certified shock absorption helps protect athletes' joints and meet international sports standards.

Slip-Resistant Surface

The friction coefficient meets international standards, ensuring safety during sudden stops and direction changes.

High Wear Resistance

A professional sports flooring wear layer provides outstanding durability and significantly extends service life.

BWF CERTIFIED

Designed for sports performance and safety, featuring shock absorption, slip resistance and wear resistance to meet international sports flooring standards.

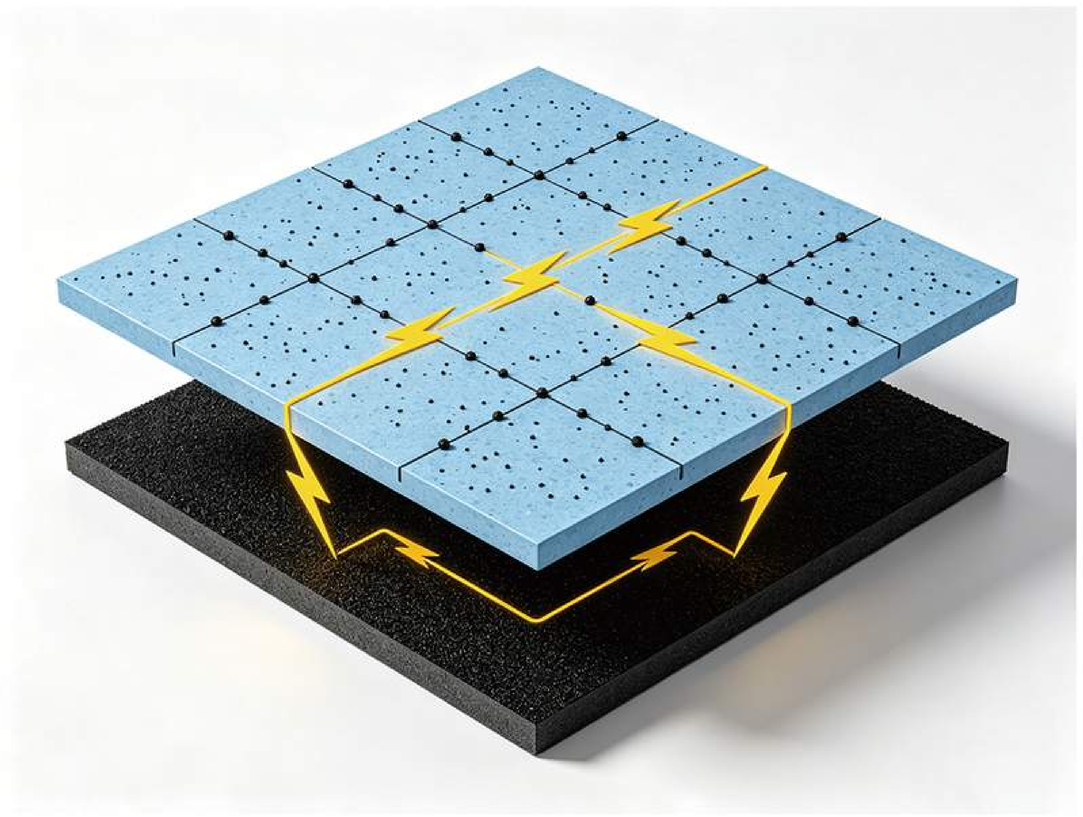

Specifications: Thickness: 3.5–10 mm

Surface Texture: Litchi / Crystal / Sand Grain

Certification: BWF Grade 1 & Grade 2 Certification

Applications: Badminton / Basketball / Volleyball / Table Tennis / Multi-purpose Sports Halls / Fitness Centers

Safeguarding Sensitive Equipment and Clean Environments
