

HEALTHCARE FLOORING SOLUTIONS

Building a Sterile & Durable Foundation for Healing

FARFLY | Certified Quality. Delivered Fast.

Critical Challenges in Modern Healthcare Environments

High footfall leads to slippery surfaces prone to wear and tear.

Significant risk of cross-contamination with high bacterial presence.

The floor was stained with iodine and blood, making it difficult to clean.

Inability to eliminate static electricity, resulting in equipment damage.

Failure to meet fire safety standards.

Non-environmentally friendly and detrimental to health.

Tailored Solutions for Every Zone

Critical Area

Operating Theaters/ICU/MRI Room

Recommended:
ESD flooring

Corridors/Lobbies/Emergency

High-Traffic Area

Recommended:
Homogeneous flooring

Patient Rooms/Nurses Station

Patient Area

+

Recommended: Homogeneous flooring
+ anti-slip flooring

Homogeneous flooring

Wear-resistant, slip-resistant, easy to clean.

Passed antimicrobial, mould-resistant, acid-resistant and alkali-resistant testing.

Possesses anti-iodine properties

Complies with EU TVOC and REACH regulations.

Fire rating: Class B1.

Anti-Slip Flooring

Non-slip and stain-resistant, suitable for damp areas.

Environmentally friendly and formaldehyde-free.

Fire rating: Class B1.

ESD flooring

Dissipative type: Resistance $10^6 - 10^9 \Omega$

Conductive type: $10^4 - 10^6 \Omega$

Carbon Network: Permanent conductivity via carbon granules.

Cleanroom Ready: Low TVOC, Non-particulating.

A Complete Hygienic System

Coving

Eliminates corners where bacteria hide

Seamless Welding

100% watertight & color-matched

Conductive Accessories

Copper tape & conductive adhesive for ESD areas

Installation Support

Expert guidance for perfect results

Trusted by Global Healthcare Providers

(SGS Antibacterial Testing Report)

(Fire Resistance Testing Report)

(TVOC and REACH EU Regulatory Compliance Testing Report)
